PROFILE SUMMARY

Final-year Textile Technology student at NIT Jalandhar with practical experience in spinning, textile testing, and quality control. Skilled in ASTM/ISO testing methods, MS Excel, and statistical analysis through industrial internship and academic projects. Interested in engineering, analytics, and technology-driven problem-solving.

EDUCATION

Dr. B.R. Ambedkar National Institute of Technology <i>Bachelor of Technology in Textile Technology</i>	2022 – Present
Nosegay Public School, Moradabad — Higher Secondary (XII)	2021
Nosegay Public School, Moradabad — Secondary (X)	2019

INTERNSHIP

Sportking India Ltd. <i>Textile Engineering Intern – Spinning Division</i>	June 2025
- Gained hands-on exposure to spinning operations including Blow Room, Carding, Drawing, Speed Frame, and Ring Frame processes for cotton and blended yarns; monitored machine parameters and production efficiency using MS Excel. - Assisted the quality control team in yarn testing using Uster Tester and Lea Strength Tester; evaluated yarn properties such as count, tenacity, elongation, hairiness, and raw material characteristics affecting yarn quality.	

PROJECTS

Elastic Performance Coefficient (EPC) Analysis of Ring and Rotor Spun Polyester-Cotton Blended Yarns	July 2024 – Present
- Investigating EPC and recovery behavior of Ring-spun and Rotor-spun Polyester-Cotton blended yarns under cyclic tensile loading using Zwick Universal Tensile Testing Machine. - Analyzing the influence of yarn structure, twist, and spinning system on elastic recovery, deformation, and tensile behavior under ASTM/ISO standard testing conditions using statistical analysis in MS Excel.	

POSITIONS OF RESPONSIBILITY

Volunteer – Prayas Initiative	NIT Jalandhar
Taught underprivileged students from local communities as part of NITJ's social outreach program; developed lesson plans and conducted interactive sessions.	
Organising Committee Member – InterNIT Sports Meet	NIT Jalandhar
Coordinated logistics and event management for inter-NIT sports competitions; managed scheduling, venue setup, and participant coordination.	

SKILLS

Textile Technical: Yarn Manufacturing (Ring & Rotor), Fabric Manufacturing (Weaving & Knitting), Textile Testing & Quality Control, Fibre Characterization (IR, FTIR, XRD, TGA, TMA, DMA), Process Control Fundamentals

Testing Instruments: Uster Tester, Zwick Tensile Tester, Lea Strength Tester, Electronic Twist Tester, Digital Wrap Reel

Software & Tools: MS Excel (Data Analysis, Pivot Tables, Charts), MS Word, MS PowerPoint

Standards & Methods: ASTM, ISO, BIS test standards for textile characterization and quality evaluation
